The 3rd International Conference on Resilience and Sustainable Regions (ICRSR 2026) will be hosted at the Polytechnic University of Setúbal – Business School (ESCE), Portugal, on 29–30 October 2026.

### Important Dates

- **Abstract submission:** 26 June 2026
- **Notification of abstract acceptance:** 26 July 2026
- **Conference dates:** 29–30 October 2026
- **Post-conference full paper submission:** 30 November 2026
- **Notification of paper acceptance:** 31 January 2027

The International Conference on Resilience and Sustainable Regions provides a forum for reflection on the future of territories from both regional and international perspectives.

In a context of profound economic, social, environmental, and technological transformations, the conference highlights the role of entrepreneurship, innovation, applied technologies, and sustainability in strengthening regional resilience and promoting competitive and inclusive development.

Inspired by the guiding pillars of E<sup>3</sup>UDRES<sup>2</sup> and aligned with the research domains of the research centres affiliated with the Polytechnic University of Setúbal, the conference promotes a multidisciplinary approach to regional development, emphasising collaboration and the connection between knowledge, institutions, and society.

Within this framework, fields such as social sciences, education, management, and tourism are highlighted alongside technology and engineering. By bringing together participants from different countries, the conference fosters international cooperation and knowledge exchange, contributing to the development of regions that are more sustainable, innovative, and socially cohesive.

Please consider submitting to this conference. We welcome contributions covering the full spectrum from theory to practice, including case studies, works in progress, conceptual papers, as well as PhD and Master's research.

In addition to submissions on the main themes of the conference, we also invite submissions to the following **special sessions with fast-track opportunities**:

- Resilient Economy, Entrepreneurship and Innovation
- Collaboration, Governance and Networks
- Marketing, Product and Branding
- Technological, Engineering and Environmental Solutions
- Regional Development and Sustainability
- Finance, Investments and Funding
- Society, Education, People and Behaviour
- Sectoral Studies on Tourism, Agriculture, among Others
- Sustainability in Construction and Buildings
